

Sub  
DL  
X

1. (Twice Amended) A method of tracking network activity of a user, comprising the steps of:

implementing a profile application on a computer of the user disposed on a network to track the network activity of the user, the profile application containing a unique ID and having a bar code distinct from the unique ID associated therewith;

entering user information of the user into the profile application;

accessing a vendor server on the network by the user to view server information; and

logging activities of the user with an activity log generated on the computer of the user while the user accesses the vendor server for server information.

CF

10. (Twice Amended) A system for tracking network activity of a user, comprising;

a profile application implemented on a computer of the user disposed on a network to track the network activity of the user, said profile application containing a unique ID and having a bar code associated therewith;

user information of the user entered into the profile application;

a vendor server on said network accessed by the user to view server information; and

an activity log generated on the computer of the user for logging activities of the user while the user accesses said vendor server for said server information.
